\\ WORKING WITH MB ALUMINIUM	64

Since its founding in 2008, MB Aluminium has pursued a clear ambition: offering a high-quality range of customised outdoor solutions with consistent quality and ease of installation, supported by a collaboration in which MB actively strengthens its partners.

This conviction forms the foundation of a warm family business driven by reliability, efficiency and collaborative thinking. We develop solutions that match real-world practice, ensure a refined end result and enable partners to work with confidence and precision.

Because we know what is valuable to our partners, we focus on support and involvement that respond to every challenge and make an impact when it matters. We do this to create a cooperation that delivers lasting value and builds for the long term, in both materials and relationships.

## Solutions that open, shape and connect spaces

MB creates solutions that enhance living and working environments by combining aesthetics, comfort and functionality. Every application integrates seamlessly into its surroundings and contributes to a carefree user experience. This creates space for extraordinary living.

## The standard of MB Aluminium

Custom-made solutions that fit any situation, with in-house production ensuring speed and consistency in every project. Thanks to extensive preparation during production, installation on location can take place more quickly and efficiently. For a high-quality and refined final result.

# MB VERANDAS & GARDEN ROOMS

Fully custom-made \ Strong designs \ Highly colorfast

## \ Fully custom-made to match any living space

Our custom-made verandas form a stylish and high-quality extension of any living space. For you as a partner, our outdoor solutions are a reliable and durable choice.

## \ Why choose an MB Veranda?

- \ Seamless gutter spans up to 8 meters
- \ Heavy-duty aluminum components
- \ Integrated water barrier for reliable leak protection
- \ Prepared in production for a one-day installation
- \ Highly colorfast thanks to premium powder coating
- \ Powerful designs with an impressive appearance

Discover our 9 distinctive models.

## \ Fully customizable to your wishes

Our verandas provide the ideal foundation for high-quality, year-round garden rooms. Thanks to a carefully engineered system, each veranda can be configured to meet your customer's exact requirements. This enables you to efficiently create a durable, stylish solution for additional living space, perfectly tailored to any situation.

## \ Can be equipped with

- \ Sun shading
- \ Screens
- \ Fixed walls
- \ Sliding walls
- \ Sliding doors
- \ Doors
- \ Windows

#### COLOR SELECTION

-  RAL 9016 \ WHITE
-  RAL 9007 \ GREY METALLIC
-  RAL 7016 \ ANTHRACITE
-  RAL 9005 \ BLACK

#### \ Clean lines for a modern look

Clean lines create a modern, refined appearance. Heavy-duty aluminum components provide exceptional strength and durability, with posts measuring 13.6 × 13.6 cm for a solid, stable structure. The result is an elegant veranda engineered for long-term performance and reliable comfort.

#### \ High-strength gutter

The MB Solid features a high-strength gutter with extra-thick walls and a double-chamber profile. This reinforced design prevents sagging and ensures stable, reliable performance across large spans and under heavy loads.

#### \ Seamless gutter spans up to 8 meters

Our gutters are available in seamless spans of up to 8 meters. The continuous gutter line enhances the clean, modern appearance while ensuring reliable water drainage, even across large spans.

#### \ Multiple roof options

The MB Solid is available with three roof material options: glass (clear, tinted, or opal), polycarbonate (clear or opal), and insulated panels. This flexibility allows precise control over light transmission and heat performance to match the requirements of each project.

MB SOLID

Highly colorfast \ Fully custom-made \ Various roof options

#### COLOR SELECTION

- RAL 9016 \ WHITE
- DB703 \ SLATE GREY
- RAL 7016 \ ANTHRACITE
- RAL 9005 \ BLACK

### \ Powerfully designed structure

A powerfully designed structure with solid 16 × 16 cm posts and a high-profile gutter, perfectly balanced in proportion, provides this veranda with exceptional strength and a robust appearance. The straight, cleanly finished gutter can optionally be fitted with a rounded gutter trim, creating a distinctly different visual style.

### \ Heavy-duty aluminum components

The MB Bold is constructed from heavy-duty aluminum components designed to deliver exceptional strength and long-term durability. The robust construction ensures high structural stability and reliable performance under a wide range of weather conditions.

### \ Fully custom-made

Each veranda is fully custom-made to suit the available space and intended application. This results in a clean, precise finish, optimal functionality, and a distinctive veranda defined by refined detailing and high-quality craftsmanship.

### \ Highly colorfast finish

Thanks to premium powder coating, the aluminum components of all MB Verandas achieve excellent colorfastness and durable protection against sun exposure, rain, and temperature fluctuations. This results in a high-quality finish designed for long-term performance with minimal maintenance.

#### COLOR SELECTION

- RAL 9016 \ WHITE
- DB703 \ SLATE GREY
- RAL 7016 \ ANTHRACITE
- RAL 9005 \ BLACK

### \ An impressive presence in your garden

The MB Cube immediately makes an impression with its large, robust profiles. The solid, high-quality design delivers exceptional stability, while the clean, refined lines create a modern and convincing appearance. The result is a veranda that combines strength and style, with comfort you can feel right away.

### \ Sleek roofline, impressive appearance

With its generous profiles, solid posts, and continuous roofline, the MB Cube presents a modern, powerful appearance. The gutter and beams form a single, flowing horizontal line, giving the veranda an impressive and well-balanced visual presence.

### \ Extremely robust construction

Extremely robust construction delivers maximum impact and an impressive, solid appearance. Featuring a heavy-duty gutter and a reinforced structure designed to be built on and relied upon.

### \ Without visible roof slope

The MB Cube appears completely flat and sleek, with a roof slope that is virtually invisible. This results in a seamless, robust design that conveys visual calm and a high-quality finish.

#### COLOR SELECTION

■ RAL 7016 \ ANTHRACITE

■ RAL 9005 \ BLACK

### \ Extremely strong in style and presence

The MB Cube Grand features an extremely robust construction, delivering exceptional strength and an impressive appearance. Its grand design with continuous lines transforms any outdoor space, resulting in a veranda with outstanding stability and a bold, unmistakable presence.

### \ A true eyecatcher

With its prominent structure and 25 cm wide posts, the MB Cube Grand immediately stands out. Its strong, distinctive appearance makes it a true eye-catcher in any outdoor space.

### \ Clean roofline without visible slope

Despite its larger dimensions, the MB Cube Grand maintains a clean, flat roofline with a roof slope that remains virtually invisible. This creates a seamless, robust design defined by visual calm and refinement.

### \ Extremely robust construction

The well-engineered design features heavy-duty aluminum components, resulting in maximum structural strength and long-term durability.

**COLOR SELECTION**

- RAL 9016 \ WHITE
- DB703 \ SLATE GREY
- RAL 7016 \ ANTHRACITE

**\ Optimal protection for your vehicle with a sleek design**

Clean lines and beams exceeding 17 cm in height give this carport a modern, refined appearance. Robust steel roof panels protect vehicles against weather and wind, while an integrated felt layer beneath the roof helps prevent condensation. The result is a solid carport that delivers reliable, year-round protection.

**\ Weather-resistant steel roof**

The robust design of the MB Carport is reflected in its steel roof. This strong and durable material makes the carport highly resistant to all weather conditions. In addition, a steel roof requires minimal maintenance and is known for its long service life.

**\ Condensation protection with felt layer**

The MB Carport includes a felt layer that effectively reduces condensation from forming on the underside of the roof. This enhances protection for the vehicle and gives the carport a refined, premium appearance.

**\ Freestanding or wall-mounted**

Thanks to its solid construction, the MB Carport can be installed either as a freestanding structure or attached to a wall. Extra-wide configurations for multiple vehicles are available, making the carport suitable for virtually any situation.

## \ Precise light and climate control with rotating louvers

The MB Prime louvered roof offers precise light and climate control through its rotating louvers. Airflow, sunlight, and shade can be easily adjusted, ensuring the veranda always remains a comfortable and pleasant space. The streamlined design of the louvers also gives the structure a modern, high-quality appearance.

### \ Fully remote-controlled

The louvered roof is equipped with a Somfy motor and is fully operated via remote control, allowing precise climate adjustment of the veranda at any time.

### \ Spans up to 5 meters

The louvered roof can span up to 5 meters in a single seamless section. This creates a clean, open design without interruptions, while delivering effective protection and a refined, modern appearance.

### \ Designed for every season

The louvered roof is weather-resistant and provides year-round protection against rain, wind, snow, and intense sunlight. This ensures comfortable outdoor use in every season.

## \ Optimal experience through custom design

### COLOR SELECTION

The veranda is available in any desired RAL color, allowing it to easily match specific preferences and project styles. This provides maximum flexibility in finish and appearance.

\ Optimal comfort

\ Easily adjustable natural light

## \ A powerful design and optimal comfort with rotating louvers

The MB Dynamic combines a powerful design with an extra-robust construction. The rotating louvers allow precise control of light, shade, and ventilation. The sleek roofline and refined finish create an impressive, well-balanced design. It is engineered to deliver both comfort and style in any outdoor setting.

### \ Flat roofline, powerful design

The MB Dynamic louvered roof is characterized by extra-heavy-duty profiles and a flat, continuous roofline. Its powerful design, defined by clean lines, integrates seamlessly with the home and outdoor space.

### \ Optional RGB LED lighting

The louvered roof can be equipped with integrated RGB LED lighting, adding atmosphere and visual appeal. The lighting can be fully customized to your preferences by fine-tuning light color and intensity.

### \ Powerful Somfy motor

The powerful Somfy motor ensures smooth and precise operation of the louvers. The system can be conveniently controlled remotely, allowing the louvers to be set to the desired angle.

## \ Perfectly balanced design and comfort

### COLOR SELECTION

The veranda is available in any desired RAL color, allowing it to easily match specific preferences and project styles. This provides maximum flexibility in finish and appearance.

\ Climate control with rotating louvers

\ Flat roofline for a powerful design

## \ Fully opening roof for an exceptional outdoor experience

The MB Advanced louvered roof features louvers that can both rotate and fully open, providing maximum flexibility in controlling sunlight and airflow. Constructed from high-quality materials, this system delivers a strong, versatile solution suitable for a wide range of applications.

### \ Powerful Somfy motor

The louvered roof is equipped with a Somfy motor, delivering smooth and precise operation. This enables easy, comfortable remote control of the louvered roof.

### \ Optional RGB LED lighting

The louvered roof can be equipped with integrated RGB LED lighting to create ambiance, with fully customizable settings for any desired mood.

### \ Available in any RAL color

The louvered roof is available in any RAL color, allowing it to be precisely matched to its surroundings and the desired appearance. The result is a refined, perfectly coordinated finish.

## \ Adaptable to any situation

### COLOR SELECTION

The veranda is available in any desired RAL color, allowing it to easily match specific preferences and project styles. This provides maximum flexibility in finish and appearance.

\ Perfectly matched to the style of the surroundings

\ Expandable with various side panels

## \ Effective sun protection with a fully opening roof

The MB Adaptive pergola combines effective sun protection with the flexibility of a fully opening, waterproof canopy. The system provides reliable protection against sun and rain, features a robust construction, and requires minimal maintenance. This pergola is also well suited for hospitality applications.

### \ Water- and dirt-repellent fabric with strong UV protection

The pergola fabric is water- and dirt-repellent, ensuring long-lasting appearance and easy maintenance. Strong UV protection helps prevent fading over time.

### \ Powered by the powerful Somfy motor

The MB Adaptive is equipped with a powerful Somfy motor, enabling smooth and precise operation. This allows the louvered roof to be easily and comfortably controlled remotely.

### \ Weather-resistant fabric that keeps out rain, wind, and snow

The sunshade fabric is highly weather-resistant, providing reliable protection against rain, wind, and snow. This ensures dependable outdoor use throughout every season.

## \ Protection and comfort

### COLOR SELECTION

The veranda is available in any desired RAL color, allowing it to easily match specific preferences and project styles. This provides maximum flexibility in finish and appearance.

\ Integrated lighting

\ Fully opening

## MB SLIDING WALLS & SLIDING DOORS

Fully closable \ Comfort \ Extra living space

### \ Extra living space year-round

MB sliding walls and sliding doors provide an efficient solution for creating additional living space year-round. They protect against wind and rain while preserving natural light and outward visibility. The systems enhance privacy, reduce noise, keep insects out, support a comfortable indoor climate, and can be securely closed.

### \ Why choose a MB sliding wall or sliding door?

- \ Smoothly-sliding panels
- \ Safety glass for a solid, secure system
- \ Heavy-duty aluminium components
- \ Prepared in production for fast installation
- \ Effective protection against mosquitoes and other insects
- \ Highly colorfast as a result of premium powder coating

### \ Widely applicable

Our sliding walls, sliding doors and guillotines offer a high-quality solution for a wide range of applications and can be integrated into almost any type of construction, including aluminum, wood, stone, and other materials. The MB sliding door is also available in both uninsulated and insulated versions, allowing additional comfort to be created in any living space.

### \ Sliding wall accessories

- \ Weather seals
- \ Carriers
- \ Locking system
- \ Handles

### \ Sliding door accessories

- \ Ventilation grill
- \ Locking system
- \ Handles

**COLOR SELECTION**

- RAL 9016 \ WHITE

- DB703 \ SLATE GREY
- RAL 7016 \ ANTHRACITE
- RAL 9005 \ BLACK

2 rail, 3 rail, 4 rail, 5 rail and 6 rail

**\ Elegant, flexible, and comfortable**

MB sliding walls create stylish extra living space all year-round. They protect against rain and wind while maintaining natural light and outward views. With flexible panels, you control the level of openness for optimal comfort in every season.

**\ Extra living space all year-round**

With sliding walls, a canopy or veranda is transformed into a fully enclosed garden room. The walls provide effective protection against wind and weather, creating a comfortable, multifunctional space that can be used throughout the year.

**\ Complete system**

The sliding walls are supplied as a complete system, including weather seals, handles, smooth-gliding panels, and U-profiles for optimal draft protection. An optional locking system can be added.

**\ Clear and tinted glass**

Our sliding walls are available in both clear and tinted glass. Tinted glass enhances privacy by reducing visibility from the outside while creating a pleasantly warm atmosphere within the living space.

#### COLOR SELECTION

- RAL 9016 \ WHITE
- RAL 9007 \ GREY METALLIC
- DB703 \ SLATE GREY
- RAL 7016 \ ANTHRACITE
- RAL 9005 \ BLACK

2-part, 3-part, and 4-part

### \ Stylish extension of your space

MB sliding doors create additional living space year-round. The robust construction ensures excellent insulation and long-term durability, while the integrated locking system provides secure, reliable operation. The sliding doors are available in both uninsulated and insulated versions to suit a wide range of applications.

### \ Securely lockable

Our sliding door is designed for safety and ease of use. The locking system can be operated from both sides and is supplied as standard with two keys, ensuring secure and reliable locking.

### \ Optional ventilation grill

The optional ventilation grill can be integrated into the sliding door, ensuring a continuous supply of fresh air while maintaining a comfortable indoor climate.

### \ Clear and tinted glass

Our sliding doors are available in both clear and tinted glass. Tinted glass enhances privacy by reducing visibility from the outside while creating a pleasantly warm atmosphere within the living space.

## \ Automatic sliding walls for a living space with character

The guillotine system adds a refined and stylish character to any living space. Its advanced electric system allows the glass panels to move smoothly up and down, making it easy to switch between protection and openness. The result is a comfortable living space for every season.

### \ Heavy-duty profiles

The guillotine system is constructed from heavy-duty aluminum profiles, including a frame exceeding 12 cm in width. In addition to its solid appearance, this ensures smooth and reliable operation of the large sliding glass panels.

### \ Powerful Somfy motor

The guillotine system is powered by a Somfy motor, ensuring smooth and reliable operation. It can be easily adjusted to the desired position and conveniently controlled remotely using the remote control.

### \ Comfort at any time of day

The MB guillotine system delivers comfort and flexibility throughout the day. With a single touch, the glass panels open and close effortlessly, allowing protection and ventilation to be easily adjusted to changing weather conditions.

## \ Create a garden room that adapts to every season

\ Guillotine in closed position

## \ Solid wall systems for a stylish outdoor space

MB fixed wall systems transform a veranda into an inviting garden room, providing effective insulation and a warm, sheltered climate. Combined with sliding wall systems, the space can be comfortably used year-round.

### \ Enhanced room experience

Fixed wall systems give a veranda or canopy the immediate feel of a true room. The enclosed space offers peace and shelter, creating a stylish, high-quality extension of the home that can be optimally used year-round.

### \ Various material options

Our systems are available in full aluminum as well as with glass panels or polycarbonate. While aluminum side walls provide complete coverage, clear glass allows maximum light transmission, opal glass offers soft, even light distribution, and tinted glass enhances privacy.

### \ Widely applicable

MB fixed wall systems are highly versatile and can be integrated into almost any type of construction, including aluminum, wood, stone, and other materials. This makes them suitable for a wide range of applications and projects.

# MB SUN SHADING & SCREENS

Sleek fabric \ Water- and dirt-repellent \ High-quality materials

## \ Create the ideal climate and enjoy optimal comfort

MB sun shading and screens provide effective protection against heat and sunlight, enhance privacy, and create a comfortable, atmospheric outdoor space. Featuring sleek fabric, high-quality materials, and custom-made solutions, they integrate seamlessly into any situation.

## \ Why choose MB sun shading?

- \ Exceptionally colorfast and weather-resistant
- \ Sleek fabric finished with YKK zipper technology
- \ Electric operation with Somfy motor
- \ Stable fabric thanks to a micro-perforated structure
- \ Water- and dirt-repellent Serge Ferrari fabric

Discover our 3 distinctive models.

## \ Fully custom-made

Our sun shading, screens and roller shutters are fully custom-made to suit any situation precisely. This results in a sleek finish, a perfect fit, and a system that delivers reliable performance across all applications.

## \ Applications

- \ Verandas
- \ Canopies
- \ Garden rooms
- \ Wall systems
- \ Window frames
- \ Windows

## \ Effective outdoor sun shading for optimal climate control

MB sun shading effectively blocks intense sunlight and unwanted heat using high-quality fabric. This allows the outdoor temperature to be regulated with ease, ensuring comfortable use throughout the year. Thanks to the water- and dirt-repellent fabric, maintenance is minimal and the material offers long-lasting durability.

## \ Premium fabric for optimal performance

Soltis Perform 92-series fabric from Serge Ferrari is used. This high-performance fabric blocks up to 97% of heat and achieves its refined appearance through a micro-perforated structure.

## \ YKK zippers for consistent tension

Thanks to the automatic YKK zipper technology, the fabric is secured on both sides during operation, keeping it consistently tight. This ensures added strength and long-term durability.

## \ Over-roof and under-roof sun shading

MB sun shading is available in both over-roof and under-roof configurations. Over-roof sun shading provides the most effective heat reduction for maximum comfort, while under-roof sun shading creates a pleasant, atmospheric outdoor space.

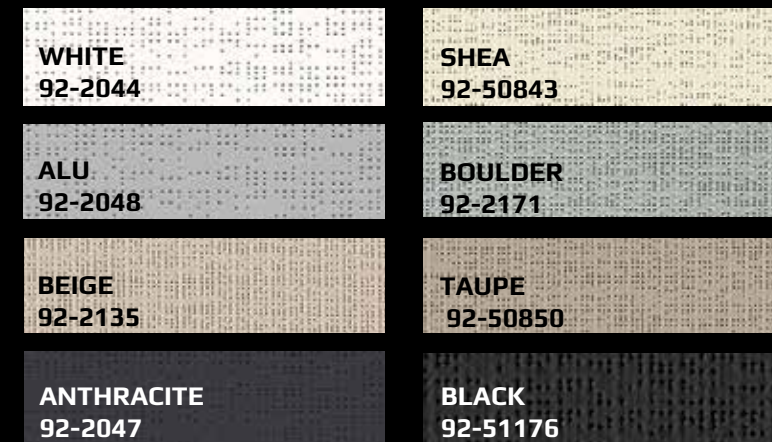

## \ Wide range of colors

### COLOR SELECTION

- RAL 9016 \ WHITE
- RAL 9007 \ GREY METALLIC
- DB703 \ SLATE GREY

## \ Advanced heat protection with optimal light transmission

MB screens provide effective heat protection while allowing balanced daylight to pass through, keeping outdoor spaces bright and comfortable. With the optional solar panel, the screens operate wirelessly, simplifying installation. Their wide applicability on verandas and window frames ensures a cool, atmospheric living space in any situation.

## \ Sun shading with solar panel

The screens can optionally be equipped with an integrated solar panel, enabling fully wireless and energy-efficient operation. This ensures easy control and added installation convenience.

## \ Widely applicable

MB screens are suitable for almost any veranda, garden room or canopy and can also be easily installed on windows and window frames. In any situation, they offer a stylish and effective solution.

## \ Ideal light transmission

The screens keep the space cool, allow optimal light transmission, and simultaneously block harmful UV radiation.

## \ Wide range of colors

### \ Effective heat and light control with full privacy

MB roller shutters provide effective protection against heat and sunlight, keeping the living space comfortable and private. The reliable, secure system ensures a pleasant indoor climate. Thanks to their sleek design, the shutters can be installed on both window frames and walls.

### \ Effective heat and light protection

MB roller shutters effectively block heat and sunlight, helping to maintain a comfortable indoor temperature. When closed, they provide full privacy and a well-protected living space.

### \ A reliable and secure system

Safety springs with a rigid connection provide enhanced protection against external lifting. This ensures effective anti-lift security and increased overall safety.

### \ Optional solar-powered operation

MB roller shutters can be equipped with an integrated solar panel, enabling fully wireless operation. This ensures easy installation while providing a sustainable, energy-efficient solution.

### \ Reduction of ambient noise

# MB GATES & FENCING

Stylish \ Durable \ Extremely solid

## \ High-quality enclosure for property and garden

MB gates and fencing provide a high-quality, secure enclosure for property and garden. Thanks to durable materials, our systems integrate seamlessly into both private and commercial outdoor spaces, giving any environment a calm, premium appearance.

## \ Why choose an MB gate and fence?

- \ Clean lines for a modern look
- \ Long lifespan thanks to high-quality materials
- \ Highly colorfast due to premium powder coating
- \ Heavy-duty aluminum components
- \ Designed for efficient installation

## \ Efficient installation

MB gates and fencing are constructed from stackable components that fit together perfectly. This modular design enables quick and efficient installation. Thanks to the precise fit, a sleek, solid finish is achieved that remains consistent in every situation.

#### COLOR SELECTION

- RAL 7016 \ ANTHRACITE
- RAL 9005 \ BLACK

### \ Versatile, low-maintenance, and stylish

MB aluminum gates offer a solid, low-maintenance solution that combines strength with a sleek, modern design. Thanks to their configurable design, the gates can be fully customized in size and color, ensuring seamless alignment with the desired style. High-quality materials further ensure a durable system that remains colorfast over time.

### \ Strong and durable

Aluminum forms the foundation of this robust, durable gate, making it easy to handle and install while ensuring a long service life.

### \ Weather-resistant

MB gates stand out for their solid construction using high-quality aluminum. Thanks to the premium coating, the color remains beautiful over time, even with daily exposure to weather and wind.

### \ Fully configurable

Our aluminum gates are fully configurable, allowing size, color, and design to be perfectly adapted to the situation. Each gate can optionally be equipped with a lock.

## \ Solid, timeless, and luxurious

MB aluminum fencing combines a sleek, refined design with a durable and stable system. Thanks to the stackable design, they can be fully customized in height, color, and shape, ensuring a seamless fit with the property and delivering a stylish, functional boundary with optimal privacy.

### \ Privacy and enclosure

Our aluminum fencing creates a secure and enclosed property without compromising on design. The clean, modern design adds elegance to any environment while providing optimal privacy.

### \ Weather-resistant and durable

The use of high-quality aluminum ensures a stable system with a long service life, while refined detailing elevates the fencing into a premium, stylish solution.

### \ Efficient installation

MB fencing is constructed from stackable components that fit together seamlessly. This modular design enables quick and efficient installation. Thanks to the precise fit, a sleek, solid finish is achieved that remains consistent in every situation.

### \ Spacious, high-quality, and refined

MB room dividers combine slim aluminum profiles with glass panels to create maximum openness and a premium separation. The panels are connected with a transparent seal, ensuring a clean, unobstructed view. The system can be extended with doors featuring magnetic closures. Thanks to the thoughtful design, installation is simple, and the system is quickly and securely installed in any space.

### \ Open and transparent

Slim aluminum profiles combined with glass panels create a light, open appearance while preserving visibility and natural daylight, adding a functional extra space.

### \ Functional and versatile

Ideal as a refined home partition or elegant office wall, combining glass and aluminum to create a calm, open atmosphere, with optional doors featuring smooth magnetic closures.

### \ Insulating and sound-dampening

The room dividers significantly improve thermal and acoustic insulation, creating a quiet and comfortable environment.

## MB DOORS & WINDOWS

High insulation values \ Configurable \ Refined

### \ Refined design with a premium finish

MB doors and frames combine refined design, durable materials, and custom craftsmanship into one high-quality solution. With a wide range of configurations, they integrate seamlessly into both residential and commercial buildings. In addition to insulated versions, uninsulated options are also available, ensuring a suitable solution for every project.

### \ Why choose MB doors and frames?

- \ High insulation values for a comfortable indoor climate
- \ Highly colorfast thanks to premium powder coating
- \ Durable with extra-solid aluminum profiles
- \ Versatile for residential and commercial applications
- \ Excellent acoustic insulation

### \ 100% Custom-made

Each door and frame is manufactured with the utmost precision, fully tailored to the project's dimensions and requirements. Configurations, profiles, and glass options are carefully coordinated, ensuring seamless lines and a perfectly fitting solution. High-quality materials and consistent finishing deliver a durable result that is not only highly functional, but also aesthetically refined at the highest level.

### \ High-quality doors with advanced insulation

All front doors are manufactured from strong, weather-resistant aluminum and can be equipped with highly insulating quadruple glazing for maximum security and durability. Stylish walk-through doors for verandas are also available, finished in aluminum panels or glass. In addition, folding sliding doors are part of the range.

### \ Energy-efficient

Our front doors come standard with insulated profiles that retain heat in winter and keep it out in summer, ensuring a comfortable indoor climate and lower energy costs.

### \ Excellent sound insulation

Aluminum doors provide a solid foundation for sound reduction. By using multi-layer insulating glazing and a well-thought-out design, they deliver excellent acoustic insulation, making them ideal for busy or noisy environments.

### \ Fully configurable

The doors are fully customizable, with options for color, handles, and glass, both within the door itself and in adjacent, overhead, surrounding panels. This ensures seamless integration with any architectural style.

### \ Luxurious and functional

#### COLOR SELECTION

Our front doors are available in a wide range of colors and combinations, allowing perfect alignment with the style and appearance of any building.

\ Fully customizable front door

\ Folding sliding doors

# WINDOWS

Strong \ Durable \ Insulated

## \ Windows where comfort and design come together

A key advantage of our aluminum windows is their low maintenance. Unlike wooden frames, they do not need painting or staining and can be easily cleaned with water and a mild detergent.

### \ Low-maintenance

Our aluminum frames are virtually maintenance-free. Unlike traditional wooden frames, they do not require painting or staining and can be easily cleaned with water and a mild detergent.

### \ Versatile

MB Aluminum windows offer versatile options for maximum daylight and comfort. Whether fixed, tilt, or fully operable, each window design delivers optimal comfort, flexibility, and ease of use.

### \ Schüco frames

The insulated Schüco frames are engineered to minimize heat loss. Using high-quality insulation materials, they meet the most stringent energy standards and contribute to a sustainable living environment.

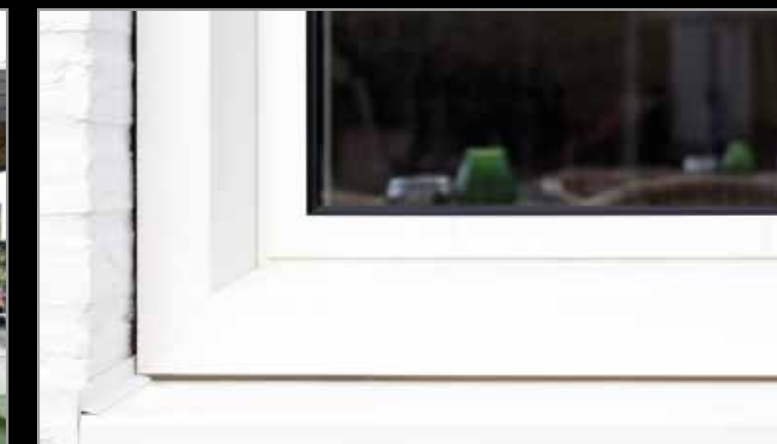

## \ Sleek and spacious

### COLOR SELECTION

Our frames are available in a wide range of colors and combinations, allowing them to perfectly match the style and appearance of any building.

\ Sense of space

### \ Durable, stylish, and flexible

Aluminum facade cladding gives any building a modern, timeless appearance while providing reliable protection against weather and wind. Low-maintenance and durable, it offers a flexible, high-quality solution for new construction, renovation, and refreshing the appearance of existing facades.

### \ Fully aluminum

Thanks to its fully aluminum design, the cladding remains strong and stable over time and is highly colorfast due to the use of premium powder coating.

### \ A completely new look in one step

With aluminum facade cladding, a building can quickly and easily achieve a fully modern appearance without the need for extensive renovations.

### \ Versatile applications

Aluminum cladding can be used not only on exterior facades and fences, but also indoors as wall cladding for a sleek, modern interior.

#### COLOR SELECTION

### \ Sleek design for maximum openness

The balustrade combines sleek aluminum profiles with transparent glass panels to create a clean, open appearance. The weather-resistant system provides unobstructed views and integrates seamlessly into any outdoor space. This results in a stylish solution for a wide range of applications, including patios, balconies, and building applications.

### \ Fully customized

Each balustrade is fully custom-made and tailored to the desired application. In addition to clear glass, opal and tinted options are also available.

### \ Weather-resistant and durable

The combination of aluminum and glass creates a stable system with a long lifespan. The balustrade is weather-resistant and low-maintenance, ensuring lasting performance in any environment.

### \ Clean and refined design

An aluminum base profile of 11.5 cm in height, available in lengths up to 6 meters in a single piece, creates a sleek and refined design. For balustrades with corners, matching corner profiles are integrated.

\\ LIVING SPACES THAT ELEVATE EVERY DAY

## \ Grow together?

### Become a partner of MB Aluminium and experience the benefits yourself

Strengthen your offering with sustainable products from MB Aluminium's wide range of aluminium solutions and create refined outdoor spaces for every project. Through our partner program, we provide personal support, technical expertise and strong commercial capabilities for a long-term and reliable partnership.

### \ All aluminium specialists, one single point of contact

You benefit from the convenience of a single point of contact while gaining access to the full expertise of all specialists within the MB Group. This provides direct access to the complete portfolio of MB Aluminium, MB Sun, MB Glas, Alu-Max, and MB Veranda, ensuring a broad and high-quality product offering.

### \ True partnership

You will receive support from advisors who think proactively with you on unique situations, installation solutions and project development. In addition, professional marketing support is available and you can make use of our showrooms and Experience Center if desired. This creates a partnership that strengthens you at every phase of the process.

### \ Efficient installation

Our in-house production enables short delivery times and supports efficient installation by our partners. This efficiency is achieved through extensive preparation during production, with components supplied in custom sizes, and key elements such as LED lighting and rubber sealing strips already pre-assembled.

# A worldwide connected partner network

Our locations, together with those of our partners, form a network with global reach. Combined with our high-quality portfolio of outdoor solutions, strong commercial capabilities, and reliable service, this creates a solid structure through which projects are delivered with reliability.

Over 500 partners worldwide. Become part of the international network.

## Our locations

You are warmly welcome to visit one of our locations, where you can experience our product range and explore the options that match your operations and ambitions.

You will also be introduced to the aluminium specialists within the MB Group: MB Aluminium, MB Sun, Alu-Max and MB Veranda. Through the partnership with MB Aluminium, you gain access to the complete offering of all aluminium specialists.
